# BRANDON THOMAS

[757-969-9591] | [bjthomas2022@gmail.com]

## SUMMARY

Computer science graduate with minors in cybersecurity and data science, CompTIA Security+ certified, and currently pursuing an M.S. in Data Science with an AI/ML concentration at Old Dominion University. Hands-on experience with Splunk-based security monitoring, Active Directory, Windows Server, Python and PowerShell automation, and network security. Seeking a part-time or internship role in cybersecurity or security operations.

## EXPERIENCE

**IT Intern (Project-Based) — Thomas & Associates of Tidewater, Chesapeake, VA** *Aug 2025 – Present*

- Contributed to the organization's Written Information Security Plan (WISP), documenting incident/breach response procedures and supporting IRS and FTC Safeguards Rule compliance
- Configured and troubleshot office network infrastructure, including router configuration, Wi-Fi troubleshooting, and network segmentation
- Implemented multi-factor authentication (MFA) and a password manager across office systems, strengthening credential security and access control
- Configured network-level ad and content blocking to reduce exposure to malicious and unwanted web content
- Diagnosed hardware issues and replaced/upgraded RAM, SSDs, and power supplies across office workstations, reducing downtime and extending equipment life

## PROJECTS

**Mini SOC Capstone** *Windows Server, Active Directory, Splunk, Python, PowerShell, VirtualBox*

- Built a Windows Server Active Directory domain with a Windows 11 client in VirtualBox, configuring 25 user accounts, organizational units, security groups, and password/account lockout policies; automated account creation with PowerShell and CSV imports
- Deployed Splunk to ingest Windows Security and System event logs, building dashboards for successful logins, failed logins, account lockouts, and user activity using Event IDs 4624, 4625, and 4740
- Developed a Python log analysis tool to detect and report failed logins and account lockouts from exported Windows event logs
- Simulated security events across the environment, investigated them end-to-end from detection through Splunk analysis to incident reporting, and documented the architecture and findings on GitHub

## EDUCATION

**M.S. Data Science — Artificial Intelligence & Machine Learning Concentration**

Old Dominion University, Norfolk, VA | Expected Spring 2028

**B.S. Computer Science**

Old Dominion University, Norfolk, VA | May 2026 | GPA: 3.52

Minors: Cybersecurity, Data Science | Dean's List: Spring 2024, Fall 2024, Fall 2025

## RELEVANT COURSEWORK

Networked Systems Security • Cryptography for Cybersecurity • Applied ML in Cybersecurity • Operating Systems • Data Structures and Algorithms • Database Concepts

## CERTIFICATIONS

CompTIA Security+ — Certified, July 2026

AWS Certified Cloud Practitioner — In Progress

## TECHNICAL SKILLS

Security: Splunk, SIEM, Active Directory, Windows Event Logs, Security Monitoring, Incident Investigation, Nmap, Wireshark, Kali Linux, CVE Research, Risk Registers

Infrastructure: Windows Server, Group Policy, Windows 11, Linux (Ubuntu), VirtualBox, Proxmox VE, DNS, Docker, Git, MySQL

Programming: Python, PowerShell, SQL, Java, C++, C#, Bash
